SITUATION SUMMARY

Train Derailment, San Francisco, San Francisco County, SPILL: 16-0934

- On 02/12/16 the California State Warning Center (CSWC) received a report from San Francisco Metro Transit Agency advising that the first car of a two car passenger train came off the track, derailing upright over an interlocking switch.
- Re-railing was in progress at the time of the report. There were train delays in both directions. Passengers were transferred to bus service. There were no injuries and no release of Hazardous Materials.
- The CSWC made all notifications per the Hazardous Materials SOP.

Weather of Concern

Northern California

- A return to winter weather is possible by the middle of next week.
- There is a chance for decent amounts of snow in the southern Sierra Nevada by next Wednesday, while showers are possible in the valley and foothills.
- At this time, this system appears to be fairly typical of weather systems for the middle of February but will be much cooler compared to recent warm temperatures which have been around 15-20 degrees above average for this time of year.

Southern California

- A large, long period west-northwest swell originating from a storm in the Gulf of Alaska will bring high surf to many west and northwest-facing beaches in Southwest California through Sunday. Surf will peak tonight through Saturday.
 - A High Surf Advisory is in effect through Sunday for many west and northwest facing beaches from San Luis Obispo County southward to LA County.
 - Additional beach erosion will be possible, especially on the Central Coast.
 - Dangerous rip currents and sneaker waves can also be expected. Swimmers and inexperienced surfers should stay out of the water.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

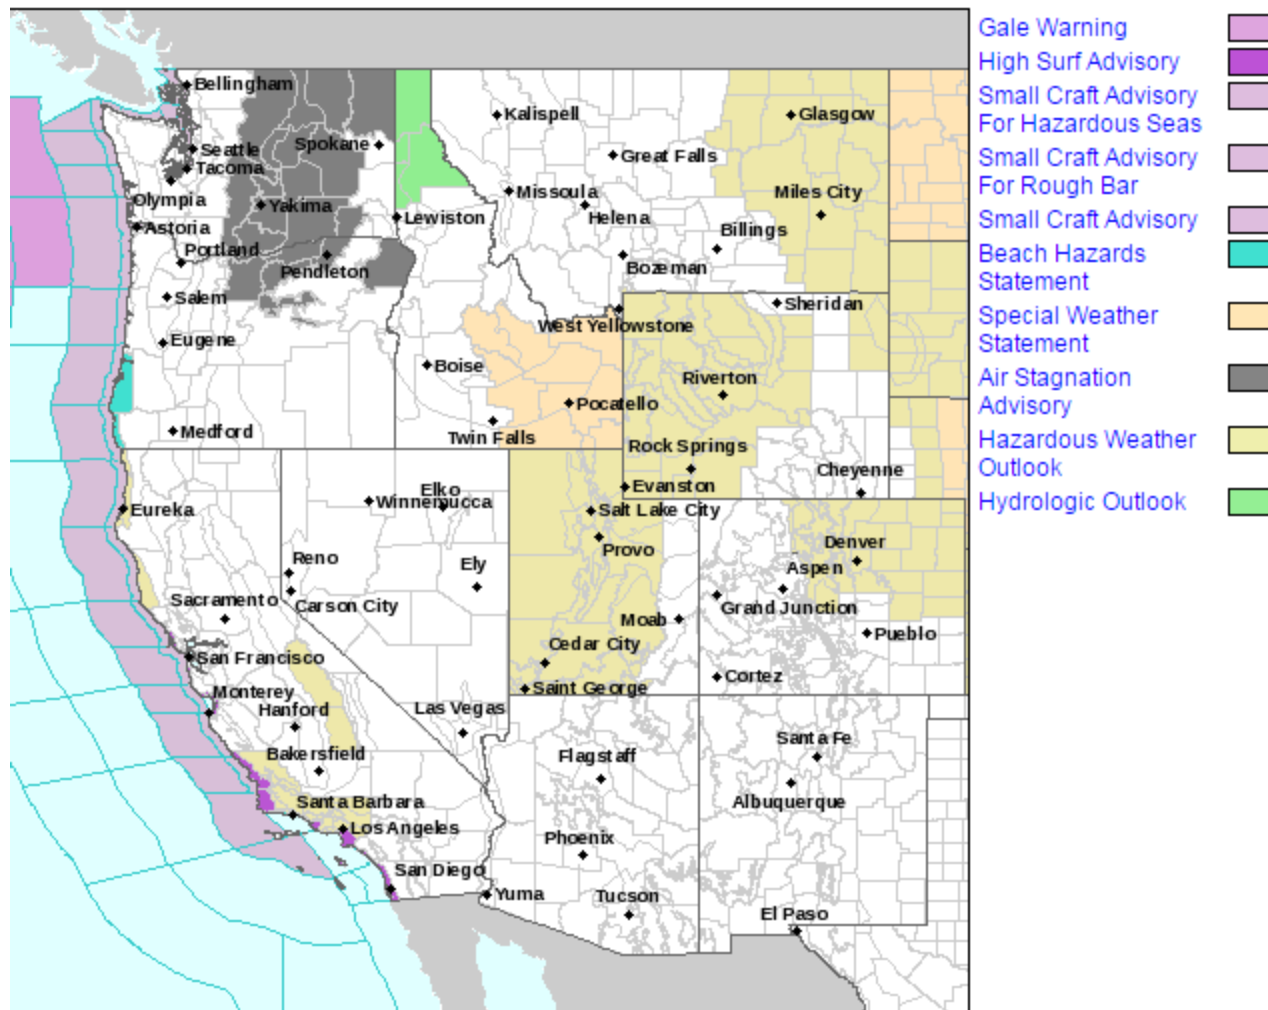

NORTHERN CALIFORNIA

The high pressure ridge is now over the eastern portion of California and low pressure is in the Gulf of Alaska. The resulting southwest flow will continue the mild conditions throughout much of the Northern California through Saturday. Afternoon maximum temperatures will reach 7-15 degrees above normal under partly cloudy skies. The exception will be far Northwestern California where more cloud cover and occasional spotty light rain showers are expected through Sunday. These areas will only receive a trace to 0.25 inches through Sunday. High pressure building in behind the front will produce dry and warm weather with local gusty northwest to northeast downslope winds through Tuesday. At this time computer models are showing a Pacific low pressure system bringing a chance of rain to the northern California Wednesday and Thursday.

SOUTHERN CALIFORNIA

A weakening trough will move into the Pacific Northwest, which will spread a veil of high clouds across the area today. These clouds, along with light onshore flow, will allow for slightly cooler temperatures today and Saturday over much of the area. Temperatures will still be 8-12 degrees above normal with highs in the 50s in the mountains to the upper 70s to lower 80s in the interior valleys. Expect slightly higher relative humidity the next couple of days, but some mid slope areas will still see readings with the 10-15% range Friday afternoon and again Saturday. The Pacific Northwest system will head towards Southern California Saturday, which will produce north winds of 15-25 mph with gusts to 35 mph over Santa Barbara County Saturday night. These winds will spread into the I-5 Corridor and the Cajon Pass Sunday. Surface pressure gradients will turn offshore Sunday night which will result in yet another round of offshore winds for the first half of next week. In general, winds will be lighter than last Monday and Tuesday, but some gusts to 40 mph will be possible in favored passes of Southern California during the peak of the offshore wind event next Tuesday. Temperatures will be close to record high readings once again Monday through Wednesday and minimum relative humidity will likely fall into the 8-12% range with poor nighttime recovery. Some relief from the heat is expected to arrive during the second half of next week when a compact low pressure area arrives. This system will likely bring rain to Central and Northern California with a decent chance of light rain across Southern California on Thursday. After this system departs, cool onshore flow looks to continue into the weekend of the 20th.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on the first Wednesday of each month.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought
